SUMMARY

Biology graduate with research experience in neuroscience, bioelectricity, aging, computational analysis, and tool development. First author of a peer-reviewed review article in *Trends in Molecular Medicine*. Transitioning from technique-driven undergraduate researcher toward question-driven researcher.

EDUCATION

Lanzhou University

Lanzhou, Gansu, China

Bachelor of Science in Biology, National Basic Subject Top-Notch Talent Program

(TOP 20 students selected from the whole school)

Sep. 2022-Jul. 2026

- **GPA:** 3.85

- **Relevant Courses:** *Cell Biology, Experiments of Cell Biology, Biochemistry, Molecular Biology, Bioinformatics Practice, Animal Biology, Experiments of Animal Physiology.*

University of California, Berkeley

Berkeley, California, United States

Berkeley International Study Program (BISP)

Jan. 2025-May. 2025

- **Relevant Courses:** *Human Physiology, Cognitive Neuroscience.*

PUBLICATION

- **Yu, M.,** Sun, P., Sun, C., & Jin, W.-L. (2023). Bioelectronic medicine potentiates endogenous NSCs for neurodegenerative diseases. *Trends in Molecular Medicine*, 29(11), 886–896.

RESEARCH EXPERIENCE

Huang Lab, University of Toronto

Remote

Supervisor: Prof. Xi Huang

Nov. 2025-May. 2026

- Investigated the function and expression of human-specific genomic elements in medulloblastoma using public data including RNA-seq, ATAC-seq.
- Screened out a series of candidate genes including or regulated by these elements for further research.

Fu & Ptáček Lab, UCSF

San Francisco, United States

Supervisor: Prof. Ying-Hui Fu & Louis J. Ptacek

Mar. 2025-Jun. 2025

- Conducted 3D visualization and quantitative analysis of neuronal projections in a sleep neuroscience project.
- Contributed tool development for 3D reconstruction and cell prediction for a manuscript in preparation.

Jin Lab, The First Hospital of Lanzhou University

Lanzhou, China

Supervisor: Prof. Weilin Jin

Nov. 2022-Jan. 2025

- Led a series of projects related to bioelectricity, including parameter-related research and the establishment of bioelectricity-related database.
- Designed and optimized electronic/magnetic stimulation systems for cellular and molecular biology experiments.
- Awarded as Outstanding Project of Action Plan for Innovation and Entrepreneurship in Lanzhou University (1st in 51 projects, 2024)
- Contributed to a peer-reviewed review article in *Trends in Molecular Medicine*.

INTERNSHIP

Clock Lab, National Institute of Biological Sciences, Beijing

Beijing, China

Supervisor: Prof. Eric Erquan Zhang

Jul. 2025-Aug. 2025

Guang-Hui Liu lab, Institute of Zoology, Chinese Academy of Sciences

Beijing, China

Supervisor: Prof. Jing Qu

Jun. 2025-Jul. 2025

SELECTED AWARDS AND HONORS

- Third Prize of the 8th China Undergraduate Life Sciences Contest;
- Outstanding Student Scholarship of Lanzhou University (2023, 2024);
- Student Model of Lanzhou University (2023).

SKILLS

- **Computer Skills:** Python, C++, C, R, Bioinformatics Analysis, Data Visualization, Modeling for 3D

Printing, Machine Learning, AI Fine-tuning.

- **Experimental Skills:** Cell Culture Techniques, Molecular Biology Techniques, Mouse Surgery and Tissue Processing, EEG.
